Beautifull Minds Foundation

Beautiful Minds has conducted seven years of research and development across 26 countries, with the last two years being concurrent with implementation, feasibility studies, and MVP production. We have also planned and developed a roadmap for 2027. On November 21, we were incorporated in Delaware and are currently in the pre-launch stage, running a pre-seed funding round.

We are excited to introduce you to BMverse, a groundbreaking platform revolutionizing the edutainment industry. We are seeking investment to unlock its full potential.

BMverse leverages genetic information for deep etymology understanding through complex algorithms and computational techniques. Our platform uses machine learning algorithms trained on large genetic datasets to recognize patterns and correlations for profiling. This allows us to provide detailed profiles of individuals' inherent etymology, including cognitive abilities, learning styles, and personality traits.

With this information, we create personalized learning experiences tailored to each user's unique strengths and weaknesses. Our advanced learning algorithms adapt in real-time to ensure that each user gets the most out of their educational experience.

We understand that technical innovation involving sensitive genetic data is high-risk and raises ethical and privacy concerns. That's why we prioritize security and transparency. Our platform uses advanced technologies such as machine learning and blockchain to ensure that user data is secure and transparent.

[INVEST LETTER](#) | [BMverse.io](#)

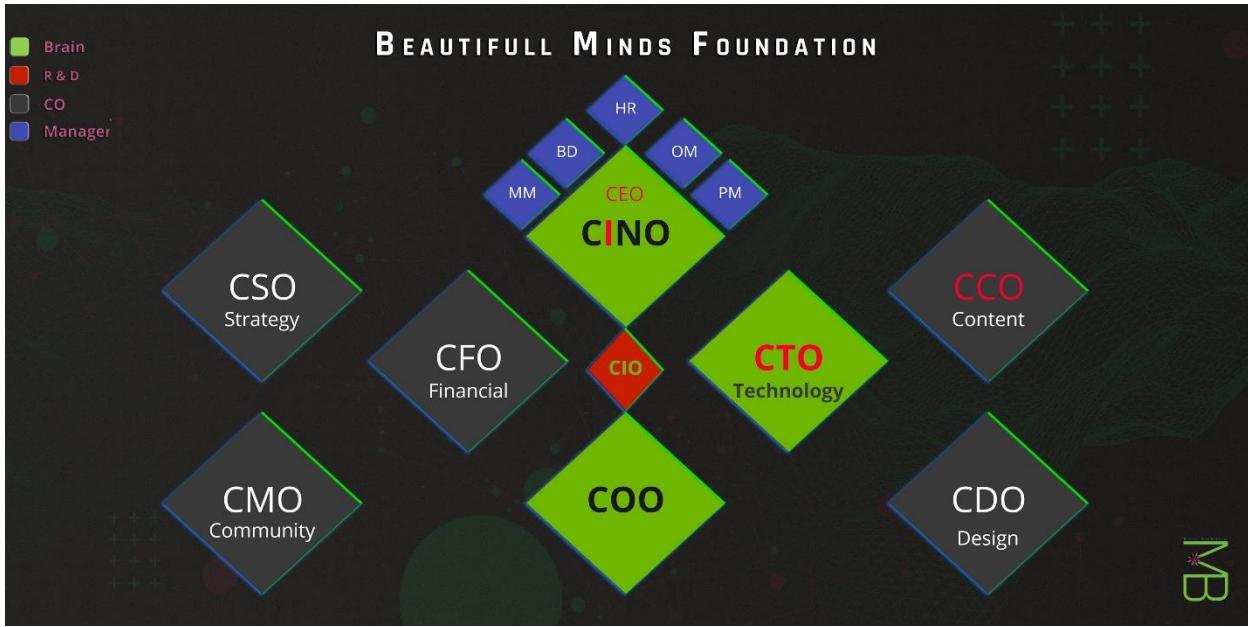

Our platform offers a unique approach to learning through games, making education fun and engaging for all ages. We conduct in-depth research on the origins of genetic traits to provide insights into the evolution of the human species. Our team specializes in reverse engineering complex systems to understand their inner workings. We leverage advanced algorithms to generate revenue streams and accelerate growth for our clients.

Currently, we are in the pre-launch stage and are running a pre-seed funding round for our company. We require \$*****K capital at a 15% share value to cover pre-launch stage costs, team development, and promotion of the pre-seed funding round. We have made noteworthy progress towards achieving our strategic goals, and securing this funding is a key step towards realizing our vision.

BMverse authority,

- Pre-seed funding round: 1,000,000
- Equity: %5
- Pre-Money: 20,000,000
- Post-Money: 100,000,000

We are passionate about solving problems through innovative and practical solutions. Our long-term investment focus enables us to create sustainable value for our clients and partners, positioning them for success in the future.

Investing in our platform will enable us to continue developing and expanding, creating even more value for our users and partners. We invite you to join us on this exciting journey as we revolutionize the edutainment industry.

Thank you for your time and consideration.

One Layer Before The Depth

BMverse is a platform that is transforming problems into features.

BMverse is a platform that is transforming problems into features.

Creating an Evolutionary Edutainment Experience for the Users.

One of the key problems that BMverse is addressing is the lack of sustainable token economies in the web3 industry.

To address this issue, BMverse has created a unique monetization algorithm that leverages the synergistic relationship between education and entertainment.

By rewarding users for their contributions, BMverse has created a sustainable token economy that encourages continued participation and engagement.

56

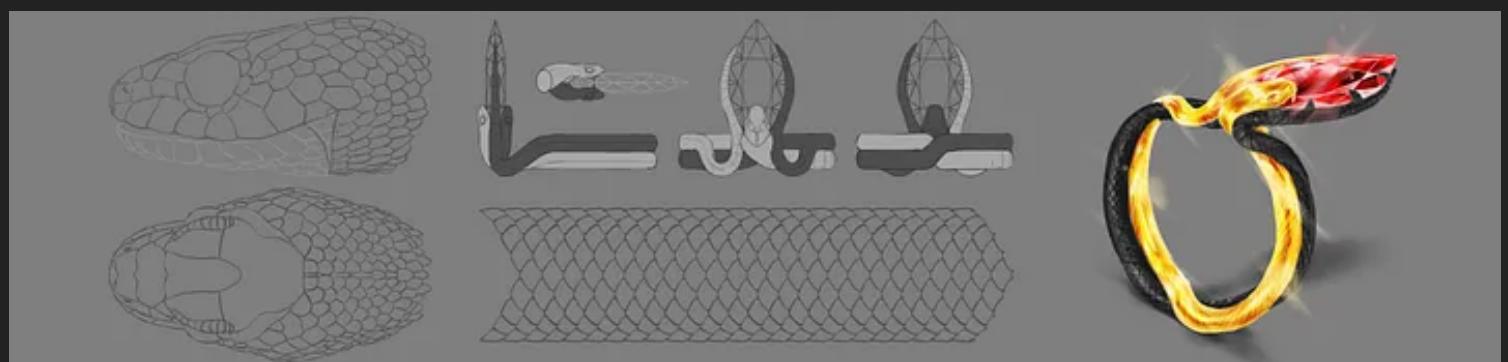

...

Creating an evolutionary edutainment experience for the users.

Another problem that BMverse is solving is the over-dependence and addiction to technology among young people. To tackle this issue, BMverse has created a platform that is designed to be both engaging and educational, providing a fun and interactive way for users to learn and grow.

Data privacy and security is also a growing concern, and BMverse has addressed this problem by incorporating blockchain technology into its platform. This provides users with a transparent and secure way to store and share sensitive information, giving them greater control over their data and how it is used.

BMverse is a platform that combines education and entertainment in a unique way, leveraging the potential of mathematical algorithms and genetics. The founder, Hesam Khalaj, believes that genetics and etymology play a critical role in understanding how people learn. To address complex and multi-disciplinary issues in the development of BMverse, reverse engineering was used as a technique to analyze and understand the system.

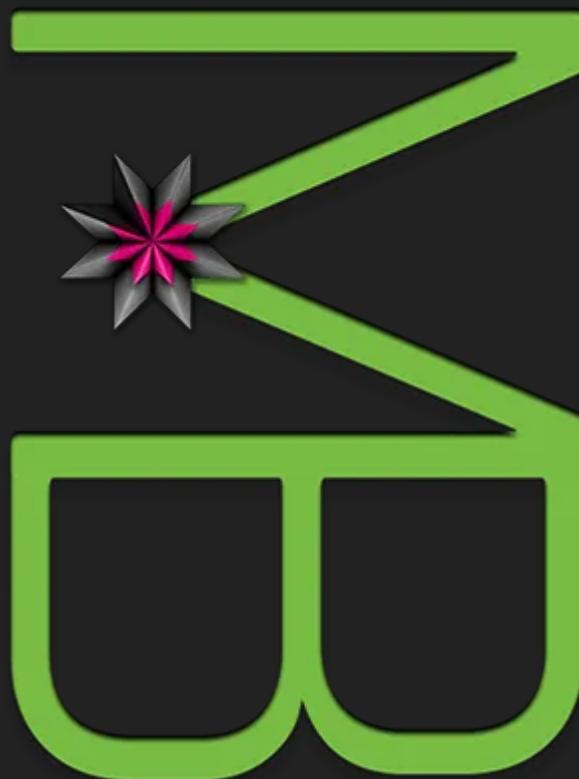

Genetics and etymology play a critical role in understanding how people learn

The goal of BMverse

Is to provide users with a platform that is transparent, secure, and protects user privacy while providing a high potential for learning ability. By addressing key problems and turning them into unique features, BMverse is revolutionizing the edutainment industry and creating a passionate community of users who are engaged, educated, and entertained.

Beautiful Minds Foundation

BMverse is more than just a gaming platform,

It's a vision for the future of education and entertainment. By leveraging cutting-edge technology like zero-knowledge proofs and decentralized consensus algorithms, BMverse aims to revolutionize the web3 gaming industry and create a new paradigm for learning.

However, this kind of technical innovation comes with risks. The use of genetic information raises ethical and privacy concerns, and any mishandling of this data could have serious consequences. As such, BMverse takes user privacy and security seriously, with a transparent and secure platform that protects user data while providing a high-quality learning experience.

To achieve its goals, BMverse has a clear set of success criteria, including the development of necessary technology infrastructure, the establishment of a thriving community of game designers and creators, and the collaboration with key stakeholders in the gaming and education industries. These objectives are supported by the platform's unique features, including developer SDKs and APIs, ready game templates, NFT trait creators, and tokenization tools.

The impact of BMverse and its Solutions for the Improvement and Development of Mental Health.

impact & solutions of BMverse.

Ways and solutions that BMverse can contribute to mental health and well-being:

- BMverse provides a new generation of community for individuals to connect with others who share similar experiences, promoting a sense of belonging and reducing feelings of isolation.
- By providing access to mental health resources and support, BMverse helps individuals develop coping strategies, manage symptoms, and improve overall mental wellness.
- BMverse offers a platform for individuals to express themselves creatively, which has been shown to have positive effects on mental health.

1

...

emselves creatively, which has been shown to have positive effects on mental health.

- Through its focus on personal growth and development, BMverse encourages individuals to set and achieve goals, which can improve self-esteem and feelings of purpose.
- The community aspect of BMverse also allows for peer support, which has been shown to be an effective form of mental health support.

• • •

The fight against discrimination of beliefs and race is a crucial aspect of creating a more just and equitable society. At BMverse, we are committed to promoting diversity and inclusion in all aspects of our platform, from the content we create to the community we cultivate. We believe that everyone should have the opportunity to express their beliefs and ideas freely, without fear of persecution or discrimination. Through education, advocacy, and activism, we strive to create a world where all individuals are treated with respect and dignity, regardless of their race, ethnicity, or belief system.

BMverse & the most important effective solution in community.

Finally, BMverse aims to reduce stigma around mental health and promote a greater understanding of mental illness, leading to increased empathy and support for those who struggle with mental health issues.

...

The First Level of Depth,

Refers to the initial layer of detail or complexity in a particular subject or topic. It is the starting point of exploration and understanding, where the basic concepts and fundamental ideas are introduced.

Beautifull Minds Foundation “BMverse”

The fundamental breakthrough of BMverse lies in the ability to leverage genetic information to gain a deep understanding of the inherent etymology of individuals. This involves complex algorithms and advanced computational techniques that analyze vast amounts of genetic data to identify key patterns and correlations.

At the core of this process is the use of machine learning algorithms that are trained on large datasets of genetic information. These algorithms are designed to recognize patterns in the data and identify correlations between different genetic markers and traits.

Once these patterns have been identified,

They are used to create a detailed profile of an individual's inherent etymology. This profile includes information on a wide range of factors, including cognitive abilities, learning styles, and personality traits.

1

...

The First Level of Depth,

This information is then used to create a personalized learning experience for each user, tailored to their unique strengths and weaknesses. This involves the use of advanced learning algorithms that adapt in real-time based on the user's performance and feedback.

This type of technical innovation is high-risk due to the complexity and sensitivity of the data involved. The use of genetic information raises a number of ethical and privacy concerns, and any mishandling of this data could have serious consequences.

However, by leveraging advanced technologies such as machine learning and blockchain, BMverse is able to provide a secure and transparent platform that protects user privacy while providing a high-quality learning experience. This type of technical innovation has the potential to revolutionize the field of edutainment, and BMverse is at the forefront of this exciting new frontier.

Problem and Solution

Problem and Solution

- **Understanding our genetic origins through etymology research:**
We conduct in-depth research on the origins of genetic traits to provide insights into the evolution of the human species.
- **Dissecting complex systems through reverse engineering:**
Our team of experts specializes in reverse engineering to break down complex systems

and understand their inner workings.

- **Monetizing algorithms to create value and drive growth:**

We leverage advanced algorithms to generate revenue streams and accelerate growth for our clients.

- **Solving problems through innovative and practical solutions:**

We approach problem-solving with creativity and practicality to deliver effective solutions that meet our clients' needs.

- **Investing in the future to generate long-term value:**

Our focus on long-term investment enables us to create sustainable value for our clients and partners, positioning them for success in the future.

BM GALAXY ASSETS REVIEW

Main NFT Assets	Total	Rarity
Galaxy= 21 assets	$1 \times 21 = 21$	Epic
Gods Nature = 21	$1 \times 21 = 21$	Epic
Planet = 4	$21 \times 4 = 84$	Rare
Goddess = 4	$21 \times 4 = 84$	Rare
Space station = 4	$21 \times 4 = 84$	Rare

Fixed sub-asset NFTs	Total	Rarity
Each Galaxy 500	$21 \times 500 = 10500$	Rare-0
Each Planet 125	$84 \times 125 = 10500$	Rare-0

Dynamic sub-asset NFTs "Created by galaxy owner"	Total	Rarity
Each galaxy 499	$21 \times 499 = 10479$	Rare-0
